Email To: N/A Proposal #: 2009-211

Terms and Conditions

- All completed Services shall be finally inspected and accepted immediately after completion.
- Based on weekday operations.
- DU requires uninterrupted access to the work area.
- All materials will be disposed of on site.
- Any delays caused by others or work outside the above scope to be documented and billed additionally at our current T&M rates.
- A signed DownUnder Professional Services Agreement (PSA) or purchase order (PO) issued by Customer, incorporating the terms and conditions included in this proposal, must be in place prior to project scheduling.
- Change Orders. All change orders or amendments to this Agreement become effective only upon acceptance by Contractor and Customer. No modifications shall be accepted in any other way
- Payment. Terms are net thirty (30) days from invoice date. No discount rebates or credits may be taken unless agreed to by Contractor in writing. Invoices paid beyond thirty (30) days after invoice date will incur a service charge of one and one-half percent (1-1/2%) per month on the unpaid balance, or, if lower, the highest percentage amount allowable by law. Contractor may suspend Services if Customer does not pay every invoice promptly and in full. At its discretion, Contractor may also require payment in full or satisfactory security prior to performance of any Services.

QUOTATION

DATE: JUNE 9TH 2009
CUSTOMER: CITY OF JACKSON
CONTACT: MARGARET CUNNINGHAM

QUOTE No: 060909BRSGJWWTP
PHONE: 517-788-4020
E-MAIL: MCUNNINGHAM@CITYOFJACKSON.ORG

EQ-The Environmental Quality Company is pleased to provide you with the following quotation for environmental management services. This pricing is contingent upon EQ credit approval as well as approval from the disposal facility. Payment terms are net 30 days and this quotation is valid for 30 days.

SCOPE OF SERVICES

EQIS will dispatch a Crew and an 8,000 gallon rear door tanker with an Operator to Jackson Waste Water Treatment Plant. Once onsite, a Tailgate safety assessment will be performed. The Crew will use an H&H Hydraulic pump to pump the sludge from the bottom of the #2 Primary Digester to the Tanker. JWWTP will supply water from Hydrants to assist in washing the #2 Digester. ALL waste will be dumped onsite in drying bed #27. When needed, EQIS will bring a 3,000 gallon Power Vac onsite to assist in vacuuming the heavy material. EQIS will make a Confined Space Entry into the #2 Digester. EQIS provides ALL of the CSE equipment including Air Monitoring, Trained Rescue, and all Safety Equipment. The Technician will use a 10-200 Water-Blaster to wash the material to the Power Vac. When the solids are removed, the Technician will do a final rinse and squeegee the remaining rinse water to the vacuum hose. EQIS requests that a JWWTP representative sign off on the work before the equipment is broken down. JWWTP estimates that the solids equal 53,339.06 gallons. EQIS can remove the waste in 2 days.

EQ brings several Benefits to the City of Jackson; not only can EQ provide Industrial Cleaning with Confined Space Entry for JWWTP, but also Sewer Inspection and Jet Roding. With our 24 hour/day Live Dispatcher EQIS is able to respond to any emergency 365 days a year. Travel time is greatly decreased with EQIS being 45 miles from Jackson. EQ brings the City of Jackson "One Stop Shopping" with the only fully integrated Environmental Company that can perform Industrial Cleaning, Waste Transportation, and Waste Disposal (Hazardous and Non-Hazardous Waste).

ACCEPTANCE OF QUOTATION 060909GBSGJWWTP:

By: _____
Signature and Title-Authorized Representative

Date: _____

EQ STANDARD TERMS AND CONDITIONS

Waste Disposal Conditions (if applicable):

1. Prices and services are contingent upon approval from the disposal facility. Approval of this material will be based upon waste analysis; a generator signed waste profile and an evaluation of a representative sample (if required) for a treatability study.
2. Quoted bulk disposal charges for solid materials will be billed by the cubic yard if the waste density is less than 2,000 pounds per cubic yard. If waste density is greater than 2,000 pounds per cubic yard, then disposal charges will be billed by the ton.
3. Surcharges from disposal facilities based on "as received" waste characteristics are in addition to quoted rates.
4. Improperly classified and/or rejected loads will be returned to the customer at their expense.
5. The Michigan DEQ will assess a manifest fee for all hazardous waste manifests used in the State of Michigan.

Industrial Services and Transportation Conditions (if applicable):

1. Washout or clean-out charges for residuals shall be at EQ cost+15% or at EQ Standard Rates unless otherwise specified.
2. A four (4) hour minimum and portal to portal charges apply to all equipment and personnel. Loading, unloading and cleaning of project specific materials and/or supplies, together with all regulatory preparation time shall be included in portal to portal charges.
3. For equipment, non-reusable materials, supplies and personnel not detailed in this quote but which become necessary to perform the work, EQ Standard Rates will be charged or cost plus 15% if not listed.
4. If disposal costs are not included in this quotation, the customer shall be responsible for securing disposal approvals and preparing all manifests and paperwork unless otherwise stated. These services, if performed and otherwise not quoted by EQ, shall be charged at \$40/hour.
5. This quote includes up to 1-hour loading/waiting time and up to 2 hours disposal time without extra cost. The customer shall be responsible for all waiting time of EQ outside the immediate control of EQ (i.e. no access to the work area/site, mandatory workplace breaks etc.) or any other influences outside the control of EQ. All loading or waiting time at the customer location beyond 1 hour and/or all disposal site time beyond 2 hours shall be surcharged at a rate of \$95/hour in ¼ hour increments. Such time shall be in addition to the base quotation and extend the fixed sum price.
6. In the event that the scope of work changes from that specified in this quote, out-of-scope work shall be at EQ Standard Rates and shall be in addition to the base quotation. No additional work shall be performed without the consent of the customer in writing.
7. Straight time hours are Monday-Friday from 8 a.m. to 4 p.m.; Overtime hours [time+1/2] are over 8 hours weekdays and Saturday; Sundays and Holidays are double time.

STANDARD TERMS AND CONDITIONS

The Agreement between the Customer and EQ – The Environmental Quality Company and/or its member companies (hereinafter "EQ") related to or associated with Delivered Waste, as herein defined, shall be governed by the following Standard Terms and Conditions in addition to the terms and conditions contained in any Waste Characterization Report, Customer Approval Quote Confirmation, Generator Approval Notification, Notice of Waste Approval Expiration, and/or Credit Agreement associated with such Delivered Waste.

The Customer may use its standard forms (such as purchase orders, acknowledgments of orders, and invoices) to administer its dealings under this Agreement for convenience purposes, but all provisions thereof in conflict with these terms and conditions shall be deemed stricken.

Definitions

The following definitions shall apply for purposes of this Agreement:

"Acceptable Waste" shall mean any hazardous waste, as defined under applicable State or federal law, determined by EQ as acceptable for treatment and/or disposal in accordance with this Agreement.

"Delivered Wastes" shall mean all wastes (i) which are transported, delivered, or tendered to EQ by the Customer; (ii) which the Customer has arranged for the transport, delivery or tender to EQ; or (iii) which are transported, delivered, or tendered to EQ under a Credit Agreement between the Customer and EQ.

"Non-Conforming Wastes" shall mean wastes that (a) are not in accordance in all material respects with the warranties, descriptions, specifications or limitations stated in the Waste Characterization Report and this Agreement; (b) have constituents or components of a type or concentration not specifically identified in the Waste Characterization Report (i) which increase the nature or extent of the hazard and risk undertaken by EQ in treating and/or disposing of the waste, or (ii) for whose treatment and/or disposal a Waste Management Facility is not designed or permitted, or (iii) which increase the cost of treatment and/or disposal of waste beyond that specified in EQ's price quote; or (c) are not properly packaged, labeled, described, or placarded, or otherwise not in compliance with United States Department of Transportation and United States Environmental Protection Agency regulations.

Control of Operations.

EQ shall have sole control over all aspects of the operation of any treatment and/or disposal facility of EQ receiving Delivered Wastes under this Agreement (hereinafter, "Waste Management Facility"), including, without limitation, maintaining EQ's desired volume of Acceptable Wastes being delivered to any Waste Management Facility by the Customer or any other person or entity.

Identification of Waste.

For each waste material to be transported, delivered, or tendered to EQ under this Agreement, the Customer shall provide, or cause to be provided, to EQ a representative sample of the waste material and a completed Waste Characterization Report containing a physical and chemical description or analysis of such waste material, which description shall conform with any and all guidelines for waste acceptance provided by EQ. On the basis of EQ's analysis of such representative sample of the waste material and such Waste Characterization Report, EQ will determine whether such wastes are Acceptable Wastes. EQ does not make any guarantee that it will handle any waste material or any particular quantity or type of waste material, and EQ reserves the right to decline to transport, treat and/or dispose of waste material. The Customer shall promptly furnish to EQ any information regarding known, suspected or planned changes in the composition of the waste material. Further, the Customer shall promptly inform EQ of any change in the characteristic or condition of the waste material which becomes known to the Customer subsequent to the date of the Waste Characterization Report.

Non-Conforming Wastes.

In the event that EQ at any time discovers that any Delivered Waste is Non-Conforming Waste, EQ may reject or revoke its acceptance of the Non-Conforming Waste. The Customer shall have seven (7) days to direct an alternative lawful manner of disposition of the waste, unless it is necessary by reason of law or otherwise to move the Non-Conforming Waste prior to expiration of the seven (7) day period. If the Customer does not direct an alternative disposal, at its option, EQ may return any such Non-Conforming Wastes to the Customer, and the Customer shall pay or reimburse EQ for all costs and expenses incurred by EQ in connection with the receipt, handling, sampling, analyses, transportation and return to the Customer of such Non-Conforming Wastes. If it is impossible or impractical for EQ to return the Non-Conforming Waste to the Customer, the Customer shall reimburse EQ for all costs, of any type or nature whatsoever, incurred by EQ, solely because such Delivered Waste was Non-Conforming Waste (including, but not limited to, all costs associated with any remedial steps necessary, due to the nature of the Non-Conforming Waste, in connection with material with which the Non-Conforming Waste may have been commingled and all expenses and charges for analyzing, handling, locating, preparing for transporting, storing and disposing of any Non-Conforming Waste).

Customer Warranty - Acceptable Wastes.

All Delivered Wastes shall be Acceptable Wastes and shall conform in all material respects to the description and specifications contained in the Waste Characterization Report. The information set forth in the Waste Characterization Report or any manifest, placard or label associated with any Delivered Wastes, or otherwise represented by the Customer or the generator (if other than the Customer) to EQ, is and shall be true, accurate and complete as of the date of receipt of the involved waste by EQ.

Customer Warranty - Title to Wastes.

Either the Customer or the generator (if other than the Customer) shall hold clear title, free of any all liens, claims, encumbrances, and charges to Delivered Waste until such waste is accepted by EQ.

Customer Warranty - Compliance with Laws.

The Customer shall comply with all applicable federal, state and local environmental statutes, regulations, and other governmental requirements, as well as directives issued by EQ from time to time, governing the transportation, treatment and/or disposal of Acceptable Wastes, including, but not limited to, all packaging, manifesting, containerization, placarding and labeling requirements.

Customer Warranty - Updating Information.

If the Customer receives information that Delivered Waste or other hazardous waste described in the Waste Characterization Report, or some component of such waste, presents or may present a hazard or risk to persons, property or the environment which was not disclosed to EQ, or if the Customer or generator (if other than the Customer) has changed the process by which such waste results, the Customer shall promptly report such information to EQ in writing.

Customer Indemnity.

The Customer shall indemnify, defend and hold harmless EQ, and its affiliated or related companies, and all of their respective present or future officers, directors, shareholders, employees and agents from and against any and all losses, damages, liabilities, penalties, fines, forfeitures, demands, claims, causes of action, suits, costs and expenses (including, but not limited to, reasonable costs of defense, settlement, and reasonable attorneys' fees), which may be asserted against any or all of them by any person or any governmental agency, or which any or all of them may hereafter suffer, incur, be responsible for or pay out, as a result of or in connection with bodily injuries (including, but not limited to, death, sickness, disease and emotional or mental distress) to any person (including EQ's employees), damage (including, but not limited to, loss of use) to any property (public or private), or any requirements to conduct or incur expense for investigative, removal or remedial expenses in connection with contamination of or adverse effect on the environment, or any violation or alleged violation of any statutes, ordinances, orders, rules or regulations of any governmental entity or agency, caused or arising out of (i) a breach of this Agreement by the Customer, (ii) the failure of any warranty of the Customer to be true, accurate and complete, or (iii) any willful or negligent act or omission of the Customer, or its employees or agents in connection with the performance of this Agreement.

Force Majeure

EQ shall not be liable for any failure to accept, receive, handle, treat, and/or dispose of Delivered Waste due to an act of God, fire, casualty, flood, war, strike, lockout, labor trouble, failure of public utilities, equipment failure, facility shutdown, injunction, accident, epidemic, riot, insurrection, destruction of operation or transportation facilities, the inability to procure materials, equipment, or sufficient personnel or energy in order to meet operational needs without the necessity of allocation, the failure or inability to obtain any governmental approvals or to meet Environmental Requirements (including, but not limited to voluntary or involuntary compliance with any act, exercise, assertion, or requirement of any governmental authority) which may temporarily or permanently prohibit operations of EQ, the Customer, or the Generator, or any other circumstances beyond the control of EQ which prevents or delays performance of any of its obligations under this Agreement.

Governing Laws

This Agreement shall in all respects be governed by and shall be construed in accordance with the laws of the State of Michigan applied to contracts executed and performed wholly within such state.

City of Jackson WWTP

DIGESTER CLEANING SCOPE OF SERVICES

Methane Evacuation & Digester Cleaning It is our expectation that prior to implementing digester cleaning; the City of Jackson WWTP shall cease all biosolids pumping into the Primary Digester. All pumps and appurtenance devices will be properly locked out and tagged out by the WWTP staff. BIOTECH AGRONOMICS shall also install its own lock out devices. City of Jackson WWTP Staff shall remove the hatches from the digester covers and safely evacuate methane gases from the digester. Forced air ventilation will be utilized to establish a safe working environment. BIOTECH AGRONOMICS will use a properly calibrated and certified multi gas meter to ensure the conditions in the digester are safe at all times.

Confined Space Entry Upon determining that conditions are safe to enter the digester, BIOTECH AGRONOMICS shall provide confined space digester cleaning services, in accordance with all State, Federal and local laws. At a minimum, we will provide an entrant, attendant and confined space supervisor. All members of the confined space team will be properly trained and certified for confined space entry. Safety will be our number one concern at all times during confined space entries. Prior to implementation of the confined space work, our supervisor will meet with the designated Contractor and/or WWTP staff to coordinate on any specific safety protocols that are particular to the Contractor and/or the City of Jackson WWTP. The designated personnel will be notified upon each entry and exit from any confined space. Confined Space permits shall be completed and reviewed by the BIOTECH AGRONOMIC site supervisor daily. Copies of confined space permits will be provided to the Contractor, if desired.

Digester Cleaning Digester cleaning will be such that the contents are removed from the inside of the digester. We will utilize fire hose with a high pressure nozzle to clean the digester and equipment. We anticipate connecting to the City of Jackson WWTP washwater supply and supplementing the pressure with a booster pump (if necessary) to provide the necessary water pressure at the tip of the hose in the digester. Our experience has shown that the key to successful digester cleaning without using large amounts of dilution water is getting the high pressure directly to the sand, silt and debris in the digester.

Health and Safety BIOTECH AGRONOMICS shall comply with all Federal, State, and local laws and regulations and take any needed actions to protect the life and health of employees on the job and the safety of the public and to protect property during the performance of the Agreement.

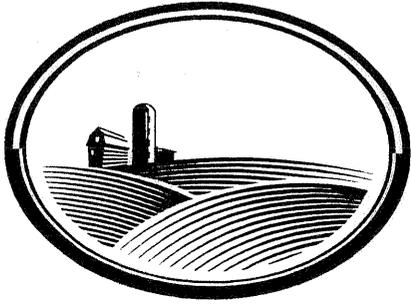

Ingress and Egress The City of Jackson WWTP and the contractor will allow ingress and egress to BIOTECH AGRONOMICS to facilitate the removal, loading and transportation of biosolids from the digesters and shall include like areas, gates and access roadways. The City of Jackson WWTP and the Contractor shall, at its own cost, provide roadways that shall accommodate repetitive semi and tanker traffic, with weights up to 150,000 lbs per load. The Contractor and City of Jackson WWTP shall provide access to facilitate travel and staging of dump trucks adjacent to the dewatering devices to provide for the removal of biosolids from the facility.

Relative Knowledge The Contractor and the City of Jackson WWTP shall provide all necessary information to BIOTECH AGRONOMICS relative to the generation and composition of the biosolids that are to be removed and landfilled. The Contractor and the City of Jackson WWTP agrees to provide copies of all applicable permits or approvals obtained from regulatory agencies to BIOTECH AGRONOMICS that are applicable to the scope of work contemplated herein.

Valid Permits The Contractor and the City of Jackson WWTP shall be responsible for, and maintain, all required federal, state and local biosolids management permits, as required by federal, state or local regulations.

Washwater The Contractor and the City of Jackson WWTP shall provide, at no cost to BIOTECH AGRONOMICS, an unlimited volume of washwater for the purpose of cleaning miscellaneous equipment utilized by BIOTECH AGRONOMICS to fulfill their obligation pursuant to this contract. Furthermore, the Contractor and the City of Jackson WWTP will provide for all required high pressure cleaning water for the purpose of hosing down the digester and appurtenances, at no cost to CONTRACTOR.

Cost of Services Contractor shall compensate BIOTECH AGRONOMICS a lump sum fee of \$13,889.00 for the performance of the aforementioned services, within thirty days of Contractor's receipt of payment.
